

# BAADER 1502 ACCUFEED

New Release!  
Dual Nozzles  
Up to 400 ppm

The BAADER-Johnson Accufeed is a patented loading device that singulates fresh bulk product and transfers it to an automatic weighing system. Throughputs range from 200 pieces per minute up to 400 pieces per minute depending on product type and system design. The BA1502 Accufeed includes variable speed electronic drive controls, vacuum header, and rotary product tray. An all new pacing device is available for higher speed options.

### Advantages:

- \* Labor savings
- \* Time saving auto backflush sanitation system
- \* Numerous configurations available
- \* Single or dual lane systems
- \* Single, dual or staggered product pick up
